

# Phospholipid

# 3 mL

0.25 mM Phospholipid Emulsion

For In Vitro Research Use Only

<b>REF</b>	PL052		2019 06
<b>LOT</b>	LDN0850		2-8 °C, Do not freeze
 Swirl gently before use			

### Composition

Phospholipid emulsion containing a mixture of highly purified phosphatidyl choline (PC), phosphatidyl serine (PS) and sphingomyelin (SM).

Molar % - PC 42%: PS 28%: SM 30%

Medium: 0.05 mol/L Tris-HCl, pH 7.6.

### Properties

A long term stabilized phospholipid emulsion with high procoagulant activity.

### Stability

A sealed vial is stable at 2-8°C until the expiry date printed on the label. An opened vial is stable for one month at 2-8°C, provided that any microbial contamination is avoided during use. Do not freeze.

### Application

This phospholipid emulsion is suitable for use in the NAPTT method and in hemostasis research related to procoagulant and anticoagulant pathways.

### Package

10 x 3 mL
