BRINGING CHROMOGENIC FACTOR IX DETERMINATION INTO THE NEW ERA

Rossix, a specialized company in hemostasis product development, presents Rox Factor IX (FIX) and Rox FIX-A (FIXa), exclusively available from Diapharma in the US and Canada.

Rossix products are for research use only in the US and Canada.
MEASURING FACTOR IX AND FACTOR IXa HAS NEVER BEEN EASIER

Rox Factor IX

- Chromogenic assay for Factor IX activity in plasma or concentrates
- High sensitivity at low levels, as little as 1% FIX in plasma
- Study of new FIX variants
  - Accurate pharmacokinetics in hemophilia B plasma samples
  - Does not overestimate FIX activity compared to certain aPTT reagents in quantifying FIX variants
- Reliable potency assignments of recombinant and plasma-derived FIX
- No interference from LA
- FIX deficient plasma not required
- Assay time less than 20 minutes
- FIX activity in animal models

Rox Factor IXa

- Determine pre-activated FIX in FIX concentrates
- Pharmacopeial assay
- FIX deficient plasma not required
- Highly sensitive and robust. Measure linearly down to 0.02 mIU FIXa per U of FIX
