

APOPTOSIS & NECROSIS

CK18: A sensitive and specific liver biomarker for AH, NAFLD, and DILI Research.

Learn what's pending for cytokeratin 18 (CK18) biomarkers. Visit Diapharma to discuss CK18 ELISAs and antibodies for cell death detection.

- Measure the final outcome of the hepatocyte
- The M30 Apoptosense® ELISA detects hepatocyte apoptosis in blood
- M65®/M65 Epideath® ELISAs detect both apoptosis and necrosis

CK18 was included as a NASH biomarker in the recently published AGA/AASLD/ACG guidance for NAFLD¹, and a recent AASLD/FDA article recommends adding CK18 as a secondary endpoint in NASH clinical trials². A recent FDA letter of support encourages exploration of CK18 for use in DILI³.
