Meet the Team

Katie Higdon, Quality Systems Specialist

I started working at Diapharma on March 7, 2016. I do Quality Assurance, Marketing and Accounts Payable. I love to read and watch football (Go Bengals!). I am getting married in September of 2017 and have a stepson and stepdaughter. We recently added a dog, Pugsley, and a cat, Dixie, to our family.

World Thrombosis Day 2016

Diapharma proudly supports WTD.
Recognized on 13 October (the birthday of thrombosis pioneer Rudolf Virchow), World Thrombosis Day (WTD) is an award-winning, collaborative global movement that focuses attention on the often overlooked and misunderstood condition of thrombosis.

With thousands of educational events around the world, WTD and its partners place a global spotlight on thrombosis as an urgent and growing health problem.

**product focus**

*Technothrombin® TGA on the Ceveron® alpha*
For the quantitative measurement of thrombin generation

- **Ceveron® alpha with TGA module** offers walk-way fluorescence for TGA
- Reconstitute the reagents and start
- LED lamp for continuous fluorogenic measurement at 37°C

**Technoclone products** are for research use only in the US and Canada

---

**ROX Factor Xla Kit**

Plasma fractionation procedures may sometimes be associated with inadvertent activation of hemostasis zymogen proteins such as **FXI**. Factor Xla (FXIa) can be a contaminant in intermediate or final products such as immunoglobulins (IgG). The **Rox Factor Xla kit** offers a highly sensitive chromogenic method for determination of sub-picomolar levels of FXIa, allowing high sample dilutions and minimizing interference from the sample matrix, and from contaminating proteins such as kallikrein, zymogen FXI and FIXa.
Rossix products are for research use only in the US and Canada

upcoming meetings

16th Biennial Midwest Platelet Conference
October 13 - 14, 2016

7th SETAC World Congress / SETAC North America 37th Annual Meeting
November 6 - 10, 2016

The Liver Meeting®
November 11 - 15, 2016
