

Perform endocrine disruptor studies without killing the fish

Hehe!
That tickles!

NON-INVASIVE, EASY TO USE, ACCURATE ECOTOXICOLOGY ASSAYS

Environmental impact matters. Use **TECO[®] Mucus Collection Swabs and test kits** to test fish for:

- + follow individuals and populations over time
- + endocrine disruption – vitellogenin ELISA
- + liver damage – hyaluraonic acid ELISA
- + stress – cortisol ELISA
- + applicable to over 35 different fish species
- + save cost and time
- + standards and controls included

Visit us at the **HDC-SETAC meeting April 20–21.**
