

# Phospholipid-TGT

# 3 mL

## 0.5 mM Phospholipid Emulsion

For In Vitro Research Use Only

**REF** PL604T

2025-09

**LOT** PLV2112

2-8 °C, Do not freeze

Swirl gently before use

### Composition

Phospholipid emulsion containing a mixture of highly purified phosphatidyl choline (PC), phosphatidyl serine (PS) and sphingomyelin (SM).

Molar % - PC 42%: PS 28%: SM 30%

Medium: 0.05 mol/L Tris-HCl, pH 7.6.

### Properties

A long term stabilized phospholipid emulsion with high procoagulant activity.

### Stability

A sealed vial is stable at 2-8°C until the expiry date printed on the label. An opened vial is stable for one month at 2-8°C, provided that any microbial contamination is avoided during use. Do not freeze.

### Application

This phospholipid emulsion is suitable for use in hemostasis research related to procoagulant and anticoagulant pathways such as in thrombin generation assays with and without activated Protein C.

### Package

10 x 3 mL, Swirl gently before use.
