

We deliver solutions.

Starting a new clinical trial requires many decisions, like researching what products will fit and be most effective. **You need a partner who can support your work at every stage, and help you find solutions ... from the start.**

That's Diapharma.

We specialize in biomarkers for:

HEMOSTASIS: bleeding and clotting disorders, hemostasis analyzers

LIVER DISEASE: Non-alcoholic Steatohepatitis (NASH), Alcoholic Hepatitis (AH)

TOXICOLOGY: drug-induced liver and kidney injury

ONCOLOGY: anti-cancer drug development

But that's just the start.

Our strength is grounded in both science and staff. For more than 20 years, Diapharma has been proud to give each of our customers a truly personalized experience—a focused, dedicated resource that understands your particular field, and has the scientific and technical expertise to help you make the best choices before the work even begins.

A valuable resource, with a team of professionals:

We provide hard data gleaned from a wealth of experience and sources

We help troubleshoot issues at all stages of development

We recommend new products and applications

We collaborate with you at every step

Personal and powerful.

It's easy to get lost in an endless list of available products or default to past testing protocols. But like you, we truly care about your results—we appreciate and value the outcome of any trial. Our team excels at helping you explore every option, leaving only product choices that are smart, straightforward, and on-track for success.

We work with you one-on-one to evaluate various biomarkers and source reagents, whether you need a second opinion or industry-backed insight. It's a relationship that carries long-lasting implications, and even more immediate results, especially during the early stages of trials and tests.

You can turn to us as the experts you know—and who know you as well. Having a team you can count on—to make real breakthroughs.

It's not just support. It's solutions.
