

PRODUCT INFORMATION SHEET
Monoclonal antibodies detecting human antigens

Anti-pan hemoglobin (panHb)

APC **ASR** **REF** IQP-575A **CONC** 50 µg/mL

ASR Analyte Specific Reagent, analytical and performance characteristics are not established. The product complies with the ASR definitions of the U.S. Food & Drug Administration (FDA).

Description

Clone PHB1

Isotype IgG1

Specificity The panHb antibody recognizes the α -chain of human hemoglobin.

Applications Flow cytometry

Representative data

PHB1 was analyzed by flow cytometry on a blood sample using adult red blood cells (RBCs). RBCs were fixed, permeabilized and stained with anti-panHb APC.

Figure: Flow cytometry analysis of whole blood stained with anti-pan hemoglobin. Histograms: uninterrupted line represents stained sample, interrupted line represents blank sample.

Handling and Storage

Antibodies are supplied in 0.01 M sodium phosphate, 0.15 M NaCl; pH 7.3, 0.2% BSA, 0.09% sodium azide (NaN₃). Store the vials at 2-8 °C. Monoclonal antibodies should be protected from prolonged exposure to light. Reagents are stable for the period shown on the vial label when stored properly.

Warranty Products sold hereunder are warranted only to conform to the quantity and contents stated on the label at the time of delivery to the customer. There are no warranties, expressed or implied, which extend beyond the description on the label of the product. IQ Products is not liable for property damage, personal injury, or economic loss caused by the product.

Characterization

To ensure consistently high-quality reagents, each batch of monoclonal antibody is tested for conformance with characteristics of a standard reagent. Representative flow cytometric data is included in this data sheet.

Warning All products contain sodium azide. This chemical is poisonous and hazardous. Handling should be done by trained staff only.

Explanation of used symbols

	Description
