

Phospholipid-TGT 3 mL

0.5 mM Phospholipid Emulsion

For In Vitro Research Use Only

REF

PL604T

2028 01

LOT

PLY1403

2-8 °C, Do not freeze

**Swirl gently before use**

Composition

Phospholipid emulsion containing a mixture of highly purified phosphatidyl choline (PC), phosphatidyl serine (PS) and sphingomyelin (SM).

Molar % - PC 42%: PS 28%: SM 30%

Medium: 0.05 mol/L Tris-HCl, pH 7.6.

Properties

A long term stabilized phospholipid emulsion with high procoagulant activity.

Stability

A sealed vial is stable at 2-8°C until the expiry date printed on the label. An opened vial is stable for one month at 2-8°C, provided that any microbial contamination is avoided during use. Do not freeze.

Application

This phospholipid emulsion is suitable for use in hemostasis research related to procoagulant and anticoagulant pathways such as in thrombin generation assays with and without activated Protein C.

Package

10 x 3 mL, Swirl gently before use.
